

PROFESSIONAL SUMMARY

Backend-focused software engineer with hands-on experience building RESTful APIs, JWT-secured authentication systems, and database-integrated applications using Node.js, Express.js, and Java. Pursuing MCA at NIT Raipur, admitted via NIMCET 2024 (AIR 708). Demonstrates strong algorithmic thinking through 350+ DSA problems solved on LeetCode. Committed to writing clean, modular, and scalable backend code.

EDUCATION

•National Institute of Technology, Raipur	2024 – 2027
Master of Computer Applications (MCA)	CGPA: 6.88
•Devi Ahilya Vishwavidyalaya (DAVV), Indore	2021 – 2024
Bachelor of Science (B.Sc.)	CGPA: 8.17

PROJECTS

- Panchayat Management System
- Full-Stack Web Application | Node.js, Express.js, MongoDB, React.js, JWT
- Engineered a full-stack platform to digitize village-level administrative operations including citizen records, government scheme tracking, and complaint management.
 - Implemented JWT-based authentication with role-based access control (RBAC), separating admin and citizen privilege levels across all API routes.
 - Designed and exposed RESTful APIs for end-to-end CRUD operations on citizen data, scheme enrollment, and complaint lifecycle management.
 - Structured MongoDB collections with schema validation to enforce data integrity and support efficient query retrieval across multiple record types.
 - Applied backend query optimization techniques to reduce data-fetching overhead and improve response consistency for high-frequency operations.
- Placement Diaries
- Full-Stack Web Application | Node.js, Express.js, MongoDB, React.js, JWT
- Architected a peer-driven platform for sharing placement and interview experiences, enabling structured knowledge exchange across departments.
 - Built JWT-based stateless authentication with role-based access control to secure content moderation and restrict privileged operations to verified users.
 - Developed RESTful APIs covering posts, nested comments, upvotes, and bookmarks — handling the complete CRUD lifecycle with structured error handling.
 - Integrated full-text search and multi-parameter filtering (by company, role, and outcome) to enable targeted discovery of relevant interview experiences.
 - Implemented server-side pagination and query optimization to reduce payload size and maintain performance under high-volume data retrieval.
- Student Management System
- Java Backend Application | Java, MySQL, JDBC
- Built a console-based backend system implementing full CRUD operations for student records via direct JDBC-MySQL integration.
 - Structured codebase using OOP principles with clear separation across DAO, service, and model layers, improving modularity and long-term maintainability.
 - Designed a normalized relational schema in MySQL to enforce referential integrity and support efficient record retrieval by student ID, name, and department.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL
Backend: Node.js, Express.js, REST APIs
Frontend: React.js, HTML, CSS
Databases: MongoDB, MySQL, JDBC
Tools: Git, GitHub, VS Code
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

ACHIEVEMENTS

- AIR 708, NIMCET 2024 — Secured All India Rank 708 in the national-level MCA entrance examination, qualifying for NIT Raipur.
- 350+ LeetCode Problems Solved — Demonstrated proficiency in algorithms, data structures, and time-complexity optimization.
